4) Click Order at the bottom of the page

Rendered from "Gerber_BoardOutlineLayer.GKO"

Board Outline

The board outline should be a watertight purple outline showing at least the edge of the board with no gaps.

We will cut non-rectangular board shapes, but you will be billed for the smallest rectangle that will encompass the design.
As an example, a 2in diameter circle is billed the same as a 2in by 2in square.

Non-plated Board Cutouts can be represented on the board outline layer, with some limitations. Slots are unsupported when indicated on the board outline layer, but usually work. To make slots with full support, use Drill Slots on the drill layer.
